

Keith Bowers

Keith Bowers founded Bowers Management Analytics in 2015 to revolutionize industrial safety using advanced AI and 3D sensing technologies. Recognized by the National Safety Council's Campbell Institute, Keith holds numerous patents for his innovations in AI and workplace safety.

With 20 years of experience at Honeywell in Environmental Health & Safety, Keith has the expertise to effectively apply big data tools. He earned degrees from Colgate University, Texas A&M University, and Arizona State University, and holds certifications such as Six Sigma Black Belt, PMP, and a Data Science Certificate from The Johns Hopkins University. Proficient in R and Python programming, and Stan modeling, Keith leads the charge in data-driven safety solutions.
